Additional Comments

Deliverable 1 - Areas of Interest

Excellent ideas! We look forward to seeing your final product!

Deliverable 2 - Sprint Plan/Data Wireframe

Your wireframe shows a reasonable guess of how you expect your cleaned and processed data to look and your notes address very reasonable (and likely important) things to consider moving forward. These notes would be a bit unclear to someone not familiar with your project and data, but they are a good idea and show that you've already put a lot of thought into this process. We think you've chosen a very ambitious capstone project, but you are making great progress. As your capstone progresses, don't be surprised if you need to pivot a bit from your initial questions or your initial data. Sometimes, limited time or limited data require mid-course adjustments.   Nonetheless, if you keep pressing forward as you have, we expect you will be pleased with your results.
